Science Education Research in the Knowledge-Based Society Dimitris Psillos 2013-03-09 This book offers a global presentation of issues under study for improving science education research in the context of the knowledge-based society at a European and international level. It includes discussions of several theoretical approaches, research overviews, research methodologies, and the teaching and learning of science. It is based on papers presented at the Third International Conference of the European Science Education Research Association (Thessaloniki, Greece, August 2001).

The Dilemma of a Ghost ; Anowa Ama Ata Aidoo 1987 Dilemma of a Ghost When Ato returns to Ghana from his studies in North America he brings with him a sophisticated black American wife. But their hopes of a happy marriage and of combining 'the sweetness and loveliest things in Africa and America' are soon shown to have been built on an unstable foundation.

Influences of the IEA Civic and Citizenship Education Studies Barbara Malak-Minkiewicz 2021-05-26 This open access book identifies the multiple ways that IEA's studies of civic and citizenship education have contributed to national and international educational discourse, research, policymaking, and practice. The IEA International Civic and Citizenship Education Study (ICCS), first conducted in 2009, was followed by a second cycle in 2016. The project was linked to the earlier IEA Civic Education Study (CIVED 1999, 2000). IEA's ICCS remains the only large-scale international study dedicated to formal and informal civic and citizenship education in school. It continues to make substantial contributions to understanding the nature of the acquired civic knowledge, attitudes, and participatory skills. It also discusses in-depth how a wide range of countries

prepare their young people for citizenship in changing political, social, and economic circumstances. The next cycle of ICCS is planned for 2022. In this book, more than 20 national representatives and international scholars from Europe, Latin America, Asia, and North America assess how the processes and findings of the 2009 and 2016 cycles of ICCS and CIVED 1999/2000 have been used to improve nations' understanding of their students' civic knowledge, beliefs, attitudes, current civic-related behaviors, and intentions for future participation in a comparative context. There are also chapters summarizing the secondary analysis of those studies' results indicating their usefulness for educational improvement and reflecting on policy issues. The analyses and reflections in this book provide timely insight into international educational discourse, policy, practice, and research in an area of education that is becoming increasingly important for many societies.

Indigenist African Development and Related Issues Akwasi Asabere-Ameyaw 2014 There is no term so heavily contested in social science literature/nomenclature than 'Development'. This book brings Indigenous perspectives to African development. It is argued that contrary to development as we know it not working, a greater part of the problem is that conventional development approaches that work have in fact not truly been followed to the letter and hence the quagmire. All this is ironic since everything we do about our world is development. So, how come there is "difficult knowledge" when it comes to learning from what we know, i.e., what local peoples do and have done for centuries as a starting point to reconstructing and reframing 'development'? In getting our heads around this paradox, we are tempted to ask more questions. How do we as African scholars and researchers begin to develop "home-grown solutions" to our problems? How do we pioneer new analytical systems for understanding our communities and offer a pathway to genuine African development, i.e., Indigenist African development? (see also Yankah, 2004). How do we speak of Indigenist development mindful of global developments and entanglements around us? Can we afford to pursue development still mired in a "catch up" scenario? Are we in a race with the development world and where do we see this race ending or where do we define as the 'finishing line'? A Publication of the Centre for School and Community Science and Technology Studies [SACOST], University of Education, Winneba, Ghana.

You're Not Listening Kate Murphy 2020-01-07 When was the last time you listened to someone, or someone really listened to you? "If you're like most people, you don't listen as often or as well as you'd like. There's no one better qualified than a talented journalist to introduce you to the right mindset and skillset—and this book does it with science and humor." -Adam Grant, #1 New York Times bestselling author of *Originals* and *Give and Take* **Hand picked by Malcolm Gladwell, Adam Grant, Susan Cain, and Daniel Pink for *Next Big Ideas*

Club** "An essential book for our times." -Lori Gottlieb, New York Times bestselling author of *Maybe You Should Talk to Someone* At work, we're taught to lead the conversation. On social media, we shape our personal narratives. At parties, we talk over one another. So do our politicians. We're not listening. And no one is listening to us. Despite living in a world where technology allows constant digital communication and opportunities to connect, it seems no one is really listening or even knows how. And it's making us lonelier, more isolated, and less tolerant than ever before. A listener by trade, New York Times contributor Kate Murphy wanted to know how we got here. In this always illuminating and often humorous deep dive, Murphy explains why we're not listening, what it's doing to us, and how we can reverse the trend. She makes accessible the psychology, neuroscience, and sociology of listening while also introducing us to some of the best listeners out there (including a CIA agent, focus group moderator, bartender, radio producer, and top furniture salesman). Equal parts cultural observation, scientific exploration, and rousing call to action that's full of practical advice, *You're Not Listening* is to listening what Susan Cain's *Quiet* was to introversion. It's time to stop talking and start listening.

The Town That Food Saved Ben Hewitt 2010-03-16 Over the past few years, Hardwick, Vermont, a typical hardscrabble farming community of 3,000 residents, has jump-started its economy and redefined its self-image through a local, self-sustaining food system unlike anything else in America. Even as the recent financial downturn threatens to cripple small businesses and privately owned farms, a stunning number of food-based businesses have grown in the region. *The Town That Food Saved* is rich with appealing, colorful characters, from the optimistic upstarts creating a new agricultural model to the long-established farmers wary of the rapid change in the region. Hewitt, a journalist and Vermonter, delves deeply into the repercussions of this groundbreaking approach to growing food, both its astounding successes and potential limitations. The captivating story of an unassuming community and its extraordinary determination to build a vibrant local food system, *The Town That Food Saved* is grounded in ideas that will revolutionize the way we eat and, quite possibly, the way we live.

Transformative Research and Evaluation Donna M. Mertens 2008-10-29 From distinguished scholar Donna M. Mertens, this core book provides a framework for making methodological decisions and conducting research and evaluations that promote social justice. The transformative paradigm has emerged from - and guides - a broad range of social and behavioral science research projects with communities that have been pushed to the margins, such as ethnic, racial, and sexual minority group members and children and adults with disabilities. Mertens shows how to formulate research questions based on community needs, develop researcher-community partnerships grounded in trust and respect, and skillfully apply quantitative, qualitative, and mixed-methods data collection strategies. Practical aspects of analyzing and reporting results are addressed, and numerous sample studies are presented. An ideal core book for graduate courses, or practitioner resource, the book includes: Commentary on the sample studies that

explains what makes them transformative. Explanations of key concepts related to oppression, social justice, and the role of research and evaluation. Questions for Thought to stimulate critical self-reflection and discussion. Advance chapter organizers and chapter summaries. The book is intended for graduate students in psychology, education, social work, sociology, and nursing, as well as practicing researchers and program evaluators. It will serve as a core book or supplement in Research Methods, Program Evaluation, and Community Psychology courses.

Forbidden Science J. Douglas Kenyon 2008-02-11 Reveals the cutting edge of New Science and shows how established science disallows inquiry that challenges the status quo--even when it produces verifiable results • Contains 43 essays by 19 researchers denoting cutting-edge, heretical, or suppressed scientific research, including Immanuel Velikovsky, Nikola Tesla, Rupert Sheldrake, and Masaru Emoto • Edited by Atlantis Rising publisher, J. Douglas Kenyon Following the model of his bestselling Forbidden History and Forbidden Religion, J. Douglas Kenyon has assembled from his bimonthly journal, Atlantis Rising, material that explores science and technology that has been suppressed by the orthodox scientific community--from the true function of the Great Pyramid and the megaliths at Nabta Playa to Immanuel Velikovsky's astronomical insights, free energy from space, cold fusion, and Rupert Sheldrake's research into telepathy and ESP. There is an organized war going on in science between materialistic theory and anything that could be termed spiritual or metaphysical. For example, Masaru Emoto's research into the energetics of water, although supported by photographic evidence, has been scoffed at by mainstream science because he has asserted that humans affect their surroundings with their thoughts. The materialism or absolute skepticism of the scientific establishment is detrimental to any scientific inquiry that thinks outside the box. This mentality is interested in preserving funding for its own projects, those that will not rock the establishment. From Tesla's discovery of alternating current to Robert Schoch's re-dating of the Sphinx, this book serves as a compelling introduction to the true history of alternative and New Science research.

The Impacts of Language and Literacy Policy on Teaching Practices in Ghana Philomena Osseo-Asare 2021-03-16 This text critically examines changes in Ghanaian language and literacy policy following independence in 1957 to consider its impacts on early literacy teaching. By adopting a postcolonial theoretical perspective, the text interrogates the logic behind policy changes which have prioritised English, local language, or biliteracy. It draws on data from interviews with teachers and researcher observation to demonstrate how policies have influenced teaching and learning. Dr Osseo-Asare's findings inform the development of a conceptual framework which highlights the socio-cultural factors that impact the literacy and biliteracy of young children in Ghana, offering solutions to help teachers combat the challenges of frequent policy changes. This timely monograph will prove to be an essential resource not only for researchers working on education policies, teacher education, and English-language learning in postcolonial Ghana but also for those looking to identify the thematic and methodological nuances of studying literacy and education in postcolonial contexts.

Teaching for Experiential Learning Scott D. Wurdinger 2009-12-16 This book describes how to change the way in which educators conduct business in the classroom. Our current educational systems lack ways to reach today's learners in relevant, meaningful ways. The five approaches in this book inspire and motivate students to learn. The authors provide in-depth descriptions into these overlapping approaches for experiential learning: active learning, problem-based learning, project-based learning, service learning, and place-based education. Each of these five approaches includes an element of student involvement and attempts to engage students in solving problems. The chapters are presented in a consistent, easy-to-read format that provides descriptions, history, research, ways to use the approach, and resources. This book will help educators transform their classrooms into dynamic learning environments.

Cheating in College Donald L. McCabe 2012-09-11 Today's students are tomorrow's leaders, and the college years are a critical period for their development of ethical standards. *Cheating in College* explores how and why students cheat and what policies, practices, and participation may be useful in promoting academic integrity and reducing cheating. The authors investigate trends over time, including internet-based cheating. They consider personal and situational explanations, such as the culture of groups in which dishonesty is more common (such as business majors) and social settings that support cheating (such as fraternities and sororities). Faculty and administrators are increasing their efforts to promote academic honesty among students. Orientation and training sessions, information on college and university websites, student handbooks that describe codes of conduct, honor codes, and course syllabi all define cheating and establish the consequences. Based on the authors' multiyear, multisite surveys, *Cheating in College* quantifies and analyzes student cheating to demonstrate why academic integrity is important and to describe the cultural efforts that are effective in restoring it. -- Gary Pavela, Syracuse University

Mathematics for Junior High Schools in West Africa Robert Akumbobe 2015-08-31 *Exam Revision from the year 2015 in the subject Mathematics For Pre-University Students*, , language: English, abstract: Preparing for exams in Mathematics has been a thorny issue especially for students at the lower levels. This is a question and answer book for students preparing for Basic School Certificate Examinations in West Africa. Every exercise is explained in order to guide the reader.

Teacher Education at the Edge Tonya Huber 2019-12-01 *International Education*

*Inquiries is a book series dedicated to realizing the global vision of Education 2030. This vision involves “ensuring inclusive and equitable quality education and promoting lifelong learning opportunities for all.” The founding editors seek to provide a forum for the diverse voices of scholars and practitioners from across the globe asking questions about transforming the vision of Education 2030 into a reality. Published chapters will reflect a variety of formats, free of methodological restrictions, involving disciplinary as well as interdisciplinary inquiries. We expect the series will be a leading forum for pioneers redefining the global discussion about the people, places and perspectives shaping Education 2030 outcomes. Education 2030 topics of interest include, but are not limited to, • Improving access to quality early childhood development, care, and pre-primary education; • Ensuring equal access for all women and men to affordable and quality education; • Increasing the number of youth and adults who have skills relevant for sustainable living and livelihoods; • Ensuring equal access for the vulnerable, including persons with disabilities, indigenous peoples and children in vulnerable situations; • Achieving levels of literacy and numeracy required to engage in communities and employment; • Acquiring the knowledge and skills needed to promote sustainable development, including: * Human right * Gender equality, * Promotion of a culture of peace and non-violence, * Global citizenship education, * The appreciation of cultural diversity and of culture’s contributions to sustainable development, • Providing safe, non-violent, inclusive and effective learning environments for all; • Recruiting, preparing, supporting, and retaining quality teachers.*

Factors contributing to academic performance of students in a Junior High School Anthony Abaidoo 2018-11-22 Bachelor Thesis from the year 2018 in the subject Pedagogy - School System, Educational and School Politics, grade: 5 (GHA-System), University of Education (Distance Learning), course: Post Graduate Diploma in Education, language: English, abstract: Students’ academic performance is a key feature in education. This study was therefore conducted primarily to assess the factors contributing to improvement in academic performance of Junior High Students (JHS) in a Basic School which is in the Gomo-East District in the Central Region of Ghana. The mixed and descriptive research design was used and a sample size of 87 respondents (79 students and 8 teachers) were selected through random sampling technique. The findings revealed that the average academic performance (47.0%) of the JHS students in the Basic School is weak and their performance in Mathematics (average score of 31.48%) and English Language (average score of 39.99%) is a fail. It was noticed that student factors that contribute to an improvement in academic performance include; regular studying, self-motivation, punctuality and regular class attendance, hard-work and interest in a subject. The teacher factors were completion of syllabus, use of TLM’s, frequent feedback to students and given students special attention. Per the findings, parent factors which was very key was parent showing concern in their children’s academics and providing them their academic needs. School factors that were significant included availability of text books and TLM’s. The study also found that parent level of education and gender has a positive relationship with academic performance but it’s insignificant. However, age has a

positive significant (5% significance level) relationship with academic performance. Based on findings, the study recommends that there should be strict monitoring on teachers to vary their teaching methods to suit their needs of the students and also to provide the students with constant feedback on their academic performance. Again, the students should be motivated and orientated to take ownership of their studies by having regular studies and attending school during school days.

NCLEX-RN Content Review Guide Kaplan Nursing 2020-06-02 Kaplan's NCLEX-RN Content Review Guide provides comprehensive review of the essential content you need to ace the NCLEX-RN exam. Effective Teaching Methods Gary D. Borich 2013-04-16 NOTE: Used books, rentals, and purchases made outside of Pearson If purchasing or renting from companies other than Pearson, the access codes for the Enhanced Pearson eText may not be included, may be incorrect, or may be previously redeemed. Check with the seller before completing your purchase. This package includes the Enhanced Pearson eText and the print bound book. In a conversational style, this market-leading text shows how to apply effective, realistic, research-based teaching practices in today's heterogeneous classrooms. *Effective Teaching Methods: Research-Based Practice, 8/e*, prepares teachers to meet the many challenges presented by the changing face of the American school and classroom teaching today—and discover the opportunities for professional growth and advancement those changes provide. The content presented is the direct result of years of research and observation of effective teaching practices in actual classrooms. These are the experiences of real teachers in real classroom, showing teachers both what to do to meet today's teaching challenges, and how to do it. The Eighth Edition provides readers with new coverage of important topics including Multiple Intelligences, professional learning communities, working with parents, and standardized testing. A new chapter on Technology Integration includes information on 21st century learning technologies, why teaching with technology is important, and assessing technology integration as well as its effectiveness. The Enhanced Pearson eText features embedded videos. Improve mastery and retention with the Enhanced Pearson eText* The Enhanced Pearson eText provides a rich, interactive learning environment designed to improve student mastery of content. The Enhanced Pearson eText is: Engaging. The new interactive, multimedia learning features were developed by the authors and other subject-matter experts to deepen and enrich the learning experience.

Convenient. Enjoy instant online access from your computer or download the Pearson eText App to read on or offline on your iPad® and Android® tablet.* Affordable. The Enhanced Pearson eText may be purchased stand-alone or with a loose-leaf version of the text for 40-65% less than a print bound book. * The Enhanced eText features are only available in the Pearson eText format. They are not available in third-party eTexts or downloads. *The Pearson eText App is available on Google Play and in the App Store. It requires Android OS 3.1-4, a 7" or 10" tablet, or iPad iOS 5.0 or later.

The Undoing Project: A Friendship That Changed Our Minds Michael Lewis 2016-12-06 "Brilliant. . . . Lewis has given us a spectacular account of two great men who faced up to uncertainty and the limits of human reason." —William Easterly, *Wall Street Journal* Forty years ago, Israeli psychologists Daniel Kahneman and Amos Tversky wrote a series of breathtakingly original papers that invented the field of behavioral economics. One of the greatest partnerships in the history of science, Kahneman and Tversky's extraordinary friendship incited a revolution in Big Data studies, advanced evidence-based medicine, led to a new approach to government regulation, and made much of Michael Lewis's own work possible. In *The Undoing Project*, Lewis shows how their Nobel Prize-winning theory of the mind altered our perception of reality.

Action Research Jack Whitehead 2006-04-27 In *Action Research: Living Theory*, Jack Whitehead and Jean McNiff set out their vision of what action research should be and can be in the 21st century.

World's Best Bank Robin Speculand 2021 *World's Best Bank - A Strategic Guide to Digital Transformation* is a thorough handbook aimed at leaders and decision-makers who want to transform their entire organization from traditional to digital.

Developing Creativity in Higher Education Norman Jackson 2006-11-22 Graduates face a world of complexity which demands flexibility, adaptability, self-reliance and innovation, but while the development of creativity is embedded in the English National Curriculum and in workplace training, the higher education sector has yet to fully recognise its importance. This book highlights how pressures such as quality assurance, peer review systems, demands for greater efficiency and increased research output are effectively discouraging innovation and creativity in higher education. It makes a bold case for the integration of creativity in higher education, drawing together contributors and research from around the world and explores valuable lessons learnt from those working in schools and professional organisations. Offering a wealth of advice on how to foster creativity on an individual and an institutional level, this book encourages lecturers to engage with the ideas and practice involved in helping students to be creative in all areas of their study.

Parentology Dalton Conley 2014-03-18 An award-winning scientist offers his unorthodox approach to childrearing: “Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions” (Amy Chua, author of *Battle Hymn of the Tiger Mother*). If you’re like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In *Parentology*, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley’s sassy kids show him the limits of his profession. *Parentology* teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You’ll be laughing and learning at the same time.

Leadership Practices Inventory James M. Kouzes 2017
