[Parentology](#) Dalton Conley 2014-03-18 An award-winning scientist offers his unorthodox approach to childrearing: "Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions" (Amy Chua, author of *Battle Hymn of the Tiger Mother*). If you're like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In Parentology, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley's sassy kids show him the limits of his profession. Parentology teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You'll be laughing and learning at the same time.

[Near East and North Africa Regional Overview of Food Security and Nutrition 2018](#) Food and Agriculture Organization of the United Nations 2019-04-25 The Near East and North Africa Regional Overview of Food Security and Nutrition provides new evidence for monitoring trends in food security and nutrition within the framework of the 2030 Sustainable Development Agenda. The in-depth analysis of progress made against Sustainable Development Goal 2 Target 2.1 (to end hunger and ensure access to food by all) and Target 2.2 (to end all forms of malnutrition), as well as the state of micronutrient deficiencies, is complemented by a review on rural transformation policies aimed at addressing food insecurity and nutrition issues. Updated estimates show that the food security situation on the region continues to worsen since 2011-2013. For, the Near East and North Africa, 11% of the region's population – 50.2 million people – are undernourished. The findings of the report showed that the failure to reduce hunger in the area is closely associated with the increase in conflict and violence in several parts of the region, as also highlighted in last year's edition. While the prevalence of undernourishment has risen from 23 to 26 percent in conflict countries since 2011-13, it has remained stable at about 5 percent in non-conflict countries. This year's report goes further to explore the relationship between food insecurity, economic growth and rural transformation. It demonstrates that economic growth in the Near East and North Africa region has been slow compared to other regions, and suggests that rural transformation can improve growth rates and generate decent employment through strengthening rural-urban linkages, improving agricultural productivity, and expanding the rural non-farm economy.

[Who's Who in Plastics Polymers](#) James P. Harrington 2000-05-09 This is the first edition of a unique new plastics industry resource: Who's Who in Plastics & Polymers. It is the only biographical directory of its kind and includes contact, affiliation and background information on more than 3300 individuals who are active leaders in this industry and related organizations. The biographical directory is i
