**Effects of Posting and Posting Placement on Staff Completion of Routine Documentation in a Supported Living Setting** Jennifer Ann Galloway 2010 Abstract: Staff persons working within supported living environments for individuals with intellectual and developmental disabilities are in a position to provide important services to those individuals. However, inherent in these settings is often a lack of direct supervision, which can result in staff persons becoming lax in their implementation of job responsibilities. That potential for less than ideal job performance on the part of staff persons can result in decreased quality of life for the individuals served. Simple feedback measures for staff persons in such settings may assist in creating an atmosphere that encourages staff awareness of job duties and motivates staff persons to perform to established standards. This study used a multiple baseline across types of documentation and a withdrawal design to examine the effects of posted group feedback on staff completion of three forms of routine documentation used in supported living settings, as well as the effect of the placement of such postings. A rubric of documentation expectations was posted following baseline for all documentation forms, and created some minimal but not meaningful improvement. Improvement in completion for the first form of documentation that occurred during posted feedback intervention failed to replicate when introduced for a second form of documentation. Movement of the posting location for the second form of documentation to a more discrete yet routinely accessed location coincided with a decrease in performance for all three staff persons. Incorporation of individual feedback memos for that same form of documentation, though, in addition to a posted rubric and posted group feedback, corresponded with improved completion rates for all three staff persons. A withdrawal of feedback interventions indicated possible maintenance.

**A Documentation System for Teacher Improvement Or Termination Kelly Frels 2003**  
This short monograph details a simple system of documentation that can be used with any school district's personnel evaluation process. The goal of the monograph is to help supervisors, especially principals, accord fair treatment to employees who are systematically evaluated. The documentation system is founded on the concept of communication. Its goal is to humanize the evaluation and termination process with the ultimate objective of improving an employee's performance to an acceptable level. Based on a series of several types of memoranda, the documentation system helps prepare principals and supervisors for hearings, lawsuits, and appeals for a variety of actions brought about by disgruntled employees and their attorneys. The process outlined in the monograph is intended to keep the volume of documentation to a minimum yet meet the need for full and complete documentation. To provide a focus, the monograph uses teachers as the representative employee group, but the principles and steps described can be applied to any relationship between a school employee and supervisor at any level. Appended are sample memoranda, a sample letter of reprimand from a superintendent to a teacher, and a checklist for creating effective documentation. (WFA).

**The Checklist Manifesto Atul Gawande 2010-04-01** The New York Times bestselling author of *Being Mortal* and *Complications* reveals the surprising power of the ordinary checklist We live in a world of great and increasing complexity, where even the most expert professionals struggle to master the tasks they face. Longer training, ever more advanced technologies—neither seems to prevent grievous errors. But in a hopeful turn, acclaimed surgeon and writer Atul Gawande finds a remedy in the humblest and simplest of techniques: the checklist. First introduced decades ago by the U.S. Air Force, checklists have enabled pilots to fly aircraft of mind-boggling sophistication. Now innovative checklists are being adopted in hospitals around the world, helping doctors and nurses respond to everything from flu epidemics to avalanches. Even in the immensely complex world of surgery, a simple ninety-second variant has cut the rate of fatalities by more than a third. In riveting stories, Gawande takes us from Austria, where an emergency checklist saved a drowning victim who had spent half an hour underwater, to Michigan, where a cleanliness checklist in intensive care units virtually eliminated a type of deadly hospital infection. He explains how checklists actually work to prompt striking and immediate improvements. And he follows the checklist revolution into fields well beyond medicine, from disaster response to investment banking, skyscraper construction, and businesses of all kinds. An intellectual adventure in which lives are lost and saved and one simple idea makes a tremendous difference, *The Checklist Manifesto* is essential reading for anyone working to get things right.
