A corporate approach is utilized versus beginning with a sole proprietorship emphasis and then converting to a corporate approach; this consistency throughout the book reduces confusion for the introductory student. This most recent revision by D. Marchand converted the text from IFRS to reflect the Generally Accepted Accounting Principles of the United States (U.S. GAAP).

Sentencing and Criminal Justice Andrew Ashworth 2010-02-04 Andrew Ashworth expertly examines the key issues in English sentencing policy and practice including the mechanisms for producing sentencing guidelines. He considers the most high-profile stages in the criminal justice process such as the Court of Appeal's approach to the custody threshold, the framework for the sentencing of young offenders and the abiding problems of previous convictions in sentencing. Taking into account the Criminal Justice and Immigration Act 2008 and the Coroners and Justice Act 2009, the book's inter-disciplinary approach places the legislation and guidelines on sentencing in the context of criminological research, statistical trends and theories of punishment. By examining the law in relation to elements of the wider criminal justice system, including the prison and probation services, students gain a rounded perspective on the relevant principles and problems of sentencing and criminal justice.

Parentology Dalton Conley 2014-03-18 An award-winning scientist offers his unorthodox approach to childrearing: " Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions " (Amy Chua, author of Battle Hymn of the Tiger Mother). If you ' re like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In Parentology, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley ' s sassy kids show him the limits of his profession. Parentology teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You ' ll be laughing and learning at the same time.
