An Introduction to Fiction Robert Stanton 1965 Preface: This book is an introduction to the reading and critical study of serious fiction. It explains the principal elements, techniques, and types of fiction; it provides a critical vocabulary and describes the writing of critical analyses; it anticipates many of the student's perennial questions and difficulties. The book will be useful to experienced readers as well as to beginners.

Parentology Dalton Conley 2014-03-18 An award-winning scientist offers his unorthodox approach to childrearing: “Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions” (Amy Chua, author of *Battle Hymn of the Tiger Mother*). If you're like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In *Parentology*, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley's sassy kids show him the limits of his profession. *Parentology* teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You'll be laughing and learning at the same time.

The Adult Learner Malcolm S. Knowles 2014-12-05 How do you tailor education to the learning needs of adults? Do they learn differently from children? How does their life experience inform their learning processes? These were the questions at the heart of Malcolm Knowles's pioneering theory of andragogy which transformed education theory in the 1970s. The resulting principles of a self-directed, experiential, problem-centered approach to learning have been hugely influential and are still the basis of the learning practices we use today. Understanding these principles is the cornerstone of increasing motivation and enabling adult learners to achieve. This eighth edition has been thoughtfully updated in terms of structure, content, and style. On top of this, online material and added chapter-level reflection questions make this classic text more accessible than ever. The new edition includes: Two new chapters: Neuroscience and Andragogy, and Information Technology and Learning. Updates throughout the book to reflect the very latest advancements in the field. A companion website with instructor aids for each chapter. If you are a researcher, practitioner or student in education, an adult learning practitioner, training manager, or involved in human resource development, this is the definitive book in adult learning that you should not be without.

Theories of Personality Richard M. Ryckman 2012-03-13 Thoroughly updated to include the latest research available, *THEORIES OF PERSONALITY, 10E* takes a unique theory by theory approach that carefully guides students through major theories on their way to a comprehensive understanding of personality. Richard Ryckman's student-friendly writing style offers a straightforward presentation of major theories, helping readers more easily distinguish between them. The text begins by providing a framework that defines personality and emphasizes the science of personality—including the interrelation between research and theory. Next it introduces each major theoretical position with an objective overview of the theorist's basic concepts and principles. It concludes by noting the ways in which the different theories stimulate additional research efforts and by presenting five current research trends resulting from the work of these earlier theorists. The result is a text that merges the best of classic and contemporary research to equip students with a solid working knowledge of personality. An Introduction to Theories of Personality Robert Ewen B 2014-01-21 This 7th Edition helps students unravel the mysteries of human behavior through its highly readable introduction to the ideas of the most significant personality theorists. Engaging biographical sketches begin each chapter, and unique capsule summaries help students review key concepts. Theories come alive through the inclusion of quotations from the theorists' writings and numerous applications such as dream interpretation, psychopathology, and psychotherapy. Significant changes in the 7th edition include an extended discussion of the practical applications of personality theory, with an emphasis on guidelines that can help people increase their self-knowledge, make better decisions, and live more fulfilling lives. Fictionalized but true-to-life examples illustrating the perils of inadequate self-knowledge include college students, parents, terrorists, business executives, and politicians, while other examples show the positive outcomes that can result from a better understanding of one's unconscious. This 7th edition also includes a more extensive discussion of how a lack of self-understanding caused difficulties for such noted theorists as Freud and Erikson, and a new section that explains how behavior can be strongly influenced by the situation as well as by one's personality. Finally, a new interactive web site provides practice test questions and other topics of interest.

A History of the Behavioral Therapies William O'Donohue 2001-04-01 In this unique work, eighteen of the most influential and significant figures in the various subareas of behavior therapy (from behavior analysis through cognitive therapy) are brought together to discuss their work and the sources and influences that affected it. At times moving, profound, and humorous, it casts a new and perhaps more human light on the most influential movement in behavioral health in the latter part of the 20th century. These intellectual biographies range in tone and intensity as each author uses their own particular style to convey their views about the field and their individual impact on it. For those interested in the behavioral and cognitive movement, this book is a must have since it is the only book to have chronicled the individual histories of the founders of the applied behavioral movement before they are lost forever.

Life Space Management P S Siwach 2014-09-30 Life Space Management is a book that throws up a new concept of enhancing individual & organisational effectiveness by managing the parameters of Life Space, a word coined by Kurt Lewin. Our entire effectiveness in life depends on how well we create space with others in the environment. All of us intrinsically yet unknowingly practice the art of creating the right space, whenever we interact with others. Our entire relationship blooms and grows or diminishes based on the quantum of life space we create with them. The author has researched on this new subject and put across his views to help the reader evolve and grow more effective in life.

Child Growth and Development Elizabeth B. Hurlock 2013-10 This is a new release of the original 1949 edition.

A Study of Self-Concept, Mental Health and Academic Achievement of Orphan and Non-Orphan Adolescents Aasia Maqbool 2016-05 All stages are important in a person's life, whether it is infancy, childhood, adolescence or adulthood, but arguably the most sensitive stage is adolescence; which starts at around 13 and ends at approximately 19 years. It is the stage when the urge of life reaches its highest peak. Accidents, Natural death and conflicts are creating generations of orphaned children. In addition the loss of a parent, orphaned children may face many hardships during their adolescence including decline in health, nutrition and psychological wellbeing. The number of children estimated to be orphaned due to all causes is estimated to be between 143 million and 210 million (UNICEF, 2012). Children and adolescents in particular are at increased risk for unresolved or complicated bereavement because of their development, vulnerability and emotional dependency. The purpose of the present investigation was to examine the differences in self-concept, mental health and academic achievement of orphan and non-orphan adolescents. The study adds to the existing literature and will become a guideline for researchers, educators, administrators and counselors to guide the students in a proper way and to frame the suitable educational environment where the adolescents can be accommodated and their self-concept, mental health and academic achievement may improve.
