Thoughtreal Michael Gryboski 2018-09-02 For Washington, DC Police Detective Brittany Johnson, this was no ordinary triple homicide. It had political implications: the three victims belonged to a diaspora community dealing with increased tension from another ethnic community based in the melting pot of the Nation's Capital. Yet this case was not merely political, but strange. The three dead men were armed and forensics showed that they fired several rounds at their attacker. How did they miss? What exactly killed them? As Johnson digs deeper, she will encounter both the very pinnacle of existential fear and the summit of passionate, unconditional love.

The Snow Killings Marney Rich Keenan 2020-06-29 Over 13 months in 1976-1977, four children were abducted in the Detroit suburbs, each of them held for days before their still-warm bodies were dumped in the snow near public roadsides. The Oakland County Child Murders spawned panic across southeast Michigan, triggering the most extensive manhunt in U.S. history. Yet after less than two years, the task force created to find the killer was shut down without naming a suspect. The case "went cold" for more than 30 years, until a chance discovery by one victim's family pointed to the son of a wealthy General Motors executive: Christopher Brian Busch, a convicted pedophile, was freed weeks before the fourth child disappeared. Veteran Detroit News reporter Marney Rich Keenan takes the reader inside the investigation of the still-unsolved murders--seen through the eyes of the lead detective in the case and the family who cracked it open--revealing evidence of a decades-long coverup of malfeasance and obstruction that denied justice for the victims.

Parentology Dalton Conley 2014-03-18 An award-winning scientist offers his unorthodox approach to childrearing: "Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions" (Amy Chua, author of *Battle Hymn of the Tiger Mother*). If you're like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In *Parentology*, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley's sassy kids show him the limits of his profession. *Parentology* teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You'll be laughing and learning at the same time.

Love, Hate and Knowledge Robert Waska 2018-04-17 This book introduces the clinical concept of analytic contact. This is a term that describes the therapeutic method of investigation that makes up psychoanalytic treatment. The field has been in debate for decades regarding what constitutes psychoanalysis. This usually centers on theoretical ideals regarding analyzability, goals, or procedure and external criteria such as frequency or use of couch. Instead, the concept of analytic contact looks at what takes place with a patient in the clinical situation. Each chapter in this book follows a wide spectrum of cases and clinical situations where hard to reach patients are provided the best opportunity for health and healing through the establishment of analytic contact. This case material closely tracks each patient's phantasies, and transference mechanisms which work to either increase, oppose, embrace, or neutralize, analytic contact. In addition, the fundamental internal conflicts all patients struggle with

between love, hate, and knowledge are represented by extensive case reports.

The ancient shamans of the Americas understood that we're not only creating our experience of the world, but are dreaming up the very nature of reality itself—that is, "life is but a dream." When you don't dream your life, you have to settle for the nightmare being dreamed by others. This book shows how to wake up from the collective nightmare and begin to dream a life of courage and grace, a sacred dream that shamans throughout time have known and served. Alberto Villoldo reveals ancient wisdom teachings that explain how to birth reality from the invisible matrix of creation; and reveals how we can interact with this matrix to

dream a life of peace, health, and abundance. He shows us that courage is all that is required to create the joy we desire!
