Owen Stuckey and Duncan Diggs are fast friends as kids - united by wrestling, go-karts, and metal bands - but as they grow into young men, their once simple affection competes with the tensions created by their respective circumstances. Owen, born to relative privilege, seems destined to get out of the city, while Duncan, honest but hard, is hurtling along the rails towards a future working the assembly line at the soulless biscuit factory, *The Bisk*. As Duncan becomes more and more desperate to escape, he finds himself at opposite ends of the law to Owen, and as the coils of the city creep ever tighter around the two friends, they find themselves struggling not to break free, but simply to survive.

*Parentology* Dalton Conley 2014-03-18 An award-winning scientist offers his unorthodox approach to childrearing: "Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions" (Amy Chua, author of *Battle Hymn of the Tiger Mother*). If you're like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In *Parentology*, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley's sassy kids show him the limits of his profession. *Parentology* teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You'll be laughing and learning at the same time.

*Courageous Dreaming* Alberto Villoldo 2009-03-01 Modern physics tells us that we're dreaming the world into being with every thought. *Courageous Dreaming* tells us how to dream our world with power and grace. The ancient shamans of the Americas understood that we're not only creating our experience of the world, but are dreaming up the very nature of reality itself—that is, "life is but a dream." When you don't dream your life, you have to settle for the nightmare being dreamed by others. This book shows how to wake up from the collective nightmare and begin to dream a life of courage and grace, a sacred dream that shamans throughout time have known and served. Alberto Villoldo reveals ancient wisdom teachings that explain how to birth reality from the invisible matrix of creation; and reveals how we can interact with this matrix to dream a life of peace, health, and abundance. He shows us that courage is all that is required to create the joy we desire!

*China's Uneven and Combined Development* Steven Rolf 2020-10-15 This book mobilises the theory of uneven and combined development to uncover the geopolitical economic drivers of China's rise. The purpose is to explain the formation and trajectory of its economic 'accumulation system' — which remains a confounding hybrid of statist and neoliberal forms of capitalism — as the outcome of China's geopolitical engagement of the USA during the late stages of the Cold War, and its participation in manufacturing global production networks (GPNs). Fear of geopolitical catastrophe drove China to open its economy, while GPNs enabled China to generate substantial export surpluses which could be recycled through state-owned banks as cheap credit and subsidies to large, vertically integrated and politically-controlled state-owned enterprises. In this way, a synergy emerged between the 'neoliberal' and 'Keynesian-Fordist' sectors of the economy, while the national-territorial state retained its form and expanded its functions. The book chronicles how this reliance on export surpluses, however, rendered China extremely vulnerable to external shocks — prompting a dramatic monetary and fiscal stimulus response to the crisis of 2008, even while sustaining the illusion of economic 'decoupling' from the global economy. Finally, it examines the growing role of the state in the current crisis-ridden economic model, as well as China's current geoeconomic and geopolitical expansionism in areas such as the Belt and Road Initiative and the militarisation of the East and South China Seas.
